

This may be useful when coupled with the population growth chart to show that immigration in North, South Central, and East is not comprised of many families. I think the school enrollment per 1,000 population would be incredibly useful. It shows that families are leaving the North and SC subregions, despite population increases. Perhaps this would represent migration among the youngest cohort, for which it is tough to make a conclusion about using the age migration analysis in the population section. - W

I have now removed Sierra Summit Academy (a charter school in Sierra County) from the data.

We can map this: we just need population by school district. Not sure where to find this - if it exists - but we can take a look if you wish. However
